LFB BIOMANUFACTURING JOINS FRANCE-BIOLEAD

Alès (France) - 3 April 2023 – The LFB Group announced today that its subsidiary LFB BIOMANUFACTURING has become a member of the France-BioLead association that supports the production of biopharmaceuticals in France. By joining France-BioLead, LFB BIOMANUFACTURING has chosen to work hand in hand with a host of French players in the sector to put our country on the map of biomanufacturers of the therapeutic innovations of tomorrow.

LFB BIOMANUFACTURING, a heavyweight in the production of recombinant proteins

Through activities ranging from the development of cell lines to the manufacturing of recombinant medicinal products according to GMP (Good Manufacturing Practice) standards, LFB BIOMANUFACTURING has more than 25 years of experience in the field of monoclonal antibodies and recombinant proteins produced by cell culture.

On its industrial site in Alès, in the Gard department of France, LFB BIOMANUFACTURING offers its customers biomanufacturing services as a CDMO (Contract Development and Manufacturing Organisation) with top-notch multifunctional expertise in biomedicinal products. This site has recently expanded to support the growing demand for biopharmaceuticals.

LFB BIOMANUFACTURING also recently rolled out its ESCAPE³⁰ growth strategy that clarifies its goals and defines its long-term priorities. With its ESCAPE³⁰ plan, LFB BIOMANUFACTURING aims for Excellence in CDMO Services for Antibodies and Therapeutic Proteins in Europe by 2030, to thus do its part to build national sovereignty in the field.

Making France a leader in the biomanufacturing of future therapeutic innovations

The France-BioLead association, born from the work of the Strategic Committee of health industrialists and technology players and an important component of France's Innovation Health 2030 strategy, aims to restore France as the European leader in biomanufacturing.

In the words of Herbert GUEDEGBE, Head of the LFB Alès site and representative of LFB in the France-BioLead association: *"LFB BIOMANUFACTURING has joined France-BioLead to support this pooling of assets and make France a land that excels in the biomanufacturing of therapeutic innovations, home to the production of at least 20 biomedicinal products by 2030."*

About LFB

LFB is a biopharmaceutical group that develops, manufactures and markets plasma-derived medicinal products and recombinant proteins for the treatment of patients with serious and often rare pathologies. Created in France in 1994, LFB is today one of the leading European companies providing plasma-derived medicinal products to healthcare professionals. Its mission is to offer patients new treatment options in three major therapeutic areas: Immunology, Haemostasis, and Intensive Care.

LFB currently markets its medicinal products in some 30 countries around the world.
